

# 3P - PoolMin- 3P Professional Pool Plaster White

## General Information

Presentation	100 lb (sack)	50 lb (sack)	Big Bag	Bulk
Availability	✓	N/A	N/A	N/A
Code	3P White			
Qualities available*	P1			

Colors: White

## Technical Information

Total Alkalinity (as Na <sub>2</sub> O) ASTM D-1208.....	0.04%
Bulk Density (ASTM D-1895).....	92.92 lb/ft <sup>3</sup>
Moisture.....	0.15%
Acid Insoluble.....	0.14%
pH (ASTM D-1208).....	10.22
Particle Shape (Microscope).....	Geometric
Dry Brightness (Hunter Reflectance).....	91.26

## Typical Chemical Analysis

Calcium Carbonate.....	95.50 - 99.00 %
Magnesium Oxide.....	0.10 - 2.50 %
Silica.....	0.30 - 0.70 %
Aluminium oxide.....	0.020 - 0.07 %
Ferric oxide .....	0.010 - 0.70 %
Potassium Oxide.....	0.010 - 0.03 %
Sodium Oxide.....	0.010 - 0.03 %
Sulphates.....	< 0.10%
Lead .....	< 10 mg/kg

## Sieve Information

% Accumulated retained

Mesh #200 ≥ 88%

## Market Applications

- Pool Plastering

\*Qualities available: S= Supreme P1= Premium 1 P2= Premium 2  
T1= Type 1 T2 = Type 2 NC= Non classified

Calcium Carbonate is subject to normal variations related to the deposits from which it is extracted.
